

Tenacious Flowmask

There are many reasons why Tenacious Flowmask is the perfect partner for virtually any paint application

With so many different masking tapes to choose from it can become very confusing to select the right one for the job. If you are looking for a tape that will give professional results every time, you should try *Flowmask*.

The key to the product's outstanding performance is the ultra-thin but strong Japanese rice paper backing.

When masking, thinner is better

K750 Tenacious Flowmask Tape

Ultra-thin Japanese paper backing that does not repel paint

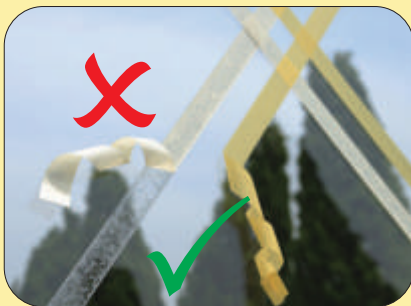

- Gives clean, low profile edge to the paint finish
- No edge-bleed on smooth surfaces
- Light weight, easy to apply and smooth down
- No bleed through when masking solvent-heavy paints and multiple, layered applications of different colours
- See through tape to pencil markings, so ideal for stencil work & air brush masking
- Tape cuts and weeds easily with scalpel for stencil work

K750 Clean Edge Strip Finish

Standard Masking Tape Finish

Leaves no residue - unlike many other tapes

High tensile strength paper

- Strips cleanly without breaking
- Can be used for masking sealants and used as a tear-strip to give clean edge, if stripped when partially cured.
- Excellent for fineline masking (use in narrow widths)
- Well defined straight lines
- Rapid clean-up and removal when finished

Anchor coat keying adhesive to paper

- Strips cleanly without leaving a residue*

Acrylic adhesive system

- Excellent UV stability and thermal range (100°C)
- Suitable for low bake automotive curing ovens
- Delicate adhesive makes tape suitable for tabbing & holding

Typical Applications for Tenacious Flowmask

- General paint masking where a well-defined edge is required - ideal for lightly textured walls, unfinished woodwork and trim, glass & metal surfaces
- Outdoor masking or indoors on glass
- Fineline masking, particularly with two pack paints
- Automotive mask for low bake ovens
- Masking on gel coats for marine applications
- Masking of caulking and sealing products to give a clean edge
- Compatible for use with lead-free flashing products

Discover the benefits of Tenacious Tapes K750 Flowmask

*Note: Tapes should be applied to dry surfaces, free from loose particles, dust, oil, grease and other surface contaminants. It is recommended that tape is tested on a small area of any new surface, prior to extensive use, to ensure suitability for the intended application.
