tesa® Tapes for the Glazing Market

tesa® 51008 PE Protection Tape

- Ideal for protecting powder coated aluminium window & door frames
- Removes cleanly with no residue
- UV resistant for 12 months
- Highly conformable and easy to unwind

tesa® 51485 Premium PVC Protection Tape

- Removes cleanly with no residue for up to 6 months
- Highly conformable backing allowing the tape to mould to intricate shapes
- Easy unwind and low curl characteristics for smooth operation
- Used extensively to protect aluminium window & door frames

tesa® 602 Series Single Sided PVC Foam Tape

- Moderate resistance to compression
- Highly conformable
- UV, ozone, oxidation, fungi and water resistant

Permafoam® 604 Series Double Sided PVC Foam Tape

- Good compression resistance & highly conformable
- Permanent elastic adhesive that prevents flanking - stops water passing between the foam and glass or aluminium window frame
- Resistant to temperature variations - will not run or ooze at elevated temperatures or stiffen and embrittle at low temperatures
- Approved for glazing & comes in a variety of thicknesses & widths

tesa® 4848 and 50551 PE Protection Films for glass

- Environmentally friendly polyethylene backing
- UV & ageing resistant acrylic adhesive
