

Tenacious **Render Tapes**

As any Tradesman will tell you, having access to the right tools for a job is critical to a good and efficient result. We do not aim to be the cheapest, just the best and that is why more and more renderers are turning to and relying on Tenacious Render Tapes.

Tenacious Render Mask (K 180)

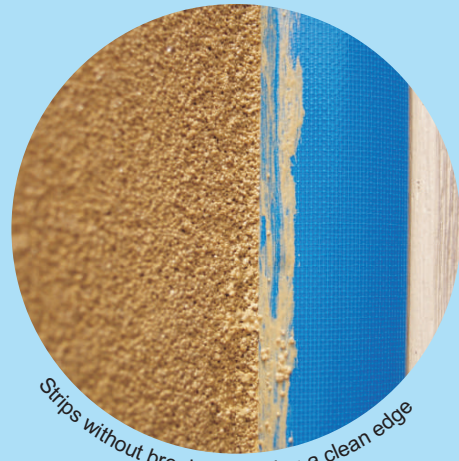

K 180 The robust & reliable render mask

Excellent for holding PE sheet to frames

This tape has been specially developed for the professional renderer as a masking tape that can be used with confidence* in all situations with all types of render. Unlike crepe paper tapes and common cloth tapes the Tenacious K180 has a special adhesive engineered to cope with the heat, UV and humidity encountered in Australia. Its heavy duty construction allows it to strip cleanly for up to a minimum of 14 days outdoors and can be used as a direct masking edge and holding PE sheeting in place.

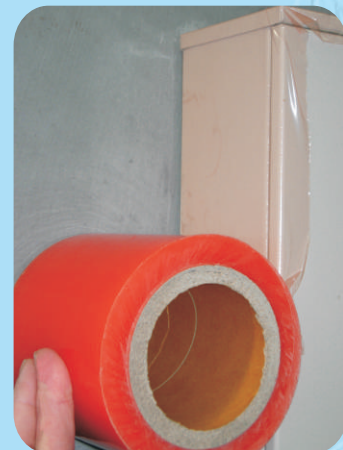

Strips without breaking, leaving a clean edge

Tenacious Render Protect (SI 36)

This tape is a thin PE protective film that can be used to cover surfaces to prevent them being covered with render splatter or over-spray:

- Windows and doors
- Gutters and down pipes
- Balustrades and railings
- Fuse boxes and letter boxes
- Signs and security alarms

Like the Render Mask it will withstand up to 14 Days outdoors and the use of these two products can significantly reduce labour costs and improve customer satisfaction.

SI 36 Protecting fuse box

Use firm pressure when applying all tapes

*Note: Tapes should be applied to dry surfaces, free from loose particles, dust, oil, grease and other surface contaminants. Tenacious Render Mask is not compatible with all types of lead-free flashing products. Consequently it is recommended that tape is tested on a small area of any new surface, prior to extensive use.
